

EVALUATION OF DELIVERING BREAKFAST AFTER THE BELL AND ACADEMIC PERFORMANCE AMONG THIRD-GRADE CHILDREN: AN APPLICATION OF THE SYNTHETIC CONTROL METHOD

Authors: Andres Cuadros-Meñaca, Michael R. Thomsen, and Rodolfo M. Nayga, Jr.

This paper uses confidential data governed by a data sharing agreement between the University of Arkansas and the Arkansas Department of Education (ADE). Those wishing to access the raw data through a similar agreement can initiate the process with ADE (<https://adedata.arkansas.gov/drra/>).

The code used in this paper have been prepared using Stata 14. Note that you need to modify the path to replication folder in each do file. To make the synthetic control estimation, please make sure that you have installed the synth package (Abadie, Diamond, and Hainmueller 2011). Also keep on mind that the nested option requires enough memory in your disk computer.

LIST OF TABLES AND FIGURES WITH CORRESPONDING DO FILES AND DATASET

A. TABLES

Table 1: Descriptive statistics

- Do file: Table 1.do

Table 2: Synthetic control estimates of the effects of BAB on z-math and z-ELA scores

Columns 1 to 4

- Do file: Do_Math.do

Columns 5 to 8

- Do file: Do_ELA.do

Table 3 Heterogeneous Effects

Columns 1 to 3

- Do file: Do_Math.do

Columns 4 to 6

- Do file: Do_ELA.do

B. FIGURES

Figure 1 Treated Units and Synthetic Control Math Scores by School

- Do file: Do_Math.do

Figure 2 Treated Units and Synthetic Control ELA Scores by School

- Do file: Do_ELA.do
